WoodTester Compact

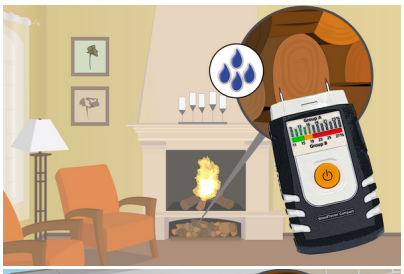

Compact wood moisture measuring device - use of recycled material

This wood moisture measuring device precisely determines the the dryness of firewood. This ensures effective energy consumption and reduced pollutant levels. The measuring device can differentiate between wood groups, has simple, one-button operation, and a stable, ergonomic housing. The moisture content is shown as both a 12-stage LED reading and a percentage. The measuring device's accuracy can be easily checked by taking a reference measurement using the self-test function in the protective cap. The low battery display ensures the battery status is visible at all times. The device automatically switches itself off after three minutes of inactivity to save energy.

- Effective reduction of energy and pollutants through precise determination of the dryness level of firewood
- Dual scale for differentiating between wood groups
- Simple testing of the measuring instrument using reference measurement through the protective cap
- Energy-saving Auto Off function when not in use
- Battery status visible at all times through low battery display
- Simple one-button operation
- Sturdy, ergonomically designed housing
- Housing with recycled content

TECHNICAL DATA

Measured Variable	Moisture content of material (resistive)
Mode	Wood (2 groups)
Measuring Range Wood	Wood group A: 9% … 24% Wood group B: 11% … 28%
Accuracy (Absolute) Wood	± 2%
Power Supply	1 x 9V 6LR61 (9V block)

9V

SCOPE OF DELIVERY

Item No. 082.004E	GTIN (EAN) 4021563735822	SU 5
